DETAILED ACTION

Double Patenting

1. Claims 1-9 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of copending Application No. 11/484,796 for the reasons set forth in item 4 of the Office action mailed 9/19/2008.

Applicant's arguments filed 12/18/2008 have been fully considered but they are not persuasive. Applicants' argument, directed solely to the provisional status of the rejection, is not accepted because the policy of withdrawing one of two provisional obviousness-type double patenting rejections between two applications, each over the other, does not apply in this case. As stated in the prior rejection, it does not appear that an ODP rejection can be made in the copending application over this application because the copending claims recite additional required structure (i.e., additional monomers) not recited in the instant claims. Accordingly, the provisional rejection cannot be withdrawn because if this were done, both applications could issue without a terminal disclaimer, even though this application includes subject matter which is obvious or anticipated by the copending claims.

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
